

## EXCITING NEWS FROM EAST END SCHOOL DISTRICT

### School Based Health Center

You may remember that East End School District had the opportunity to submit a grant application to the Arkansas Department of Education to open a School Based Health Clinic (SBHC) on our campus last year. However, the grant was awarded to 3 locations with greater need. We are happy to announce we will be reapplying this year! Our children are worth it. Our teachers are worth it. Our community is worth it!

### We need your help!

This 5-year grant program is very competitive. We will need community and student input in order to successfully obtain this grant and meet the needs of our community. We need you to complete a new assessment survey. This helps us show our community need for this health center. These should take no more than 5 minutes of your time and can be completed from a smart phone, tablet, or computer. You can also complete and return the paper copy attached to this flyer in your child's backpack.

**Who:** Students and faculty from Bigelow High School and Anne Watson Elementary

**Where:** The former ABC Preschool building

**What:** medical, mental health, dental, and vision care on school campus

**Why:** Healthy children learn better!
